

Teach Pendant

Burak Aksoy

March 4, 2020

- ❖ RR and Simple Webcam Example:
 - ❖ Highly simplified, might be helpful to teach to the first users
 - ❖ Speed is higher, 9 Fps → 16 Fps

- ❖ RR Duckiebot Drive and Camera Services are
 - ❖ renewed for RR v0.9.
 - ❖ made compatible with Python 3 and Web Browsers

- ❖ Camera feedback and driving obtained on a Web Browser page
 - Button events almost ready drive to Duckiebot.
 - Multiple camera feedback can also be obtained asynchronously.
 - Problem showing them on the web browser on different canvas elements

- ❖ Memory leak on refreshing pages, possibly due to not disconnecting the services. How to disconnect from service on refresh or closing the page?
